

VACCINE RACE

Introduction:

Vaccine Race is a board game that challenges you to develop and produce a vaccine for COVID-19! Grab some friends and roll the dice until a vaccine has been produced. You must compete with each other by sequencing, preparing, and verifying vaccines. You must also go through phases of animal and human vaccine trials all while overcoming all challenges that slow you down. Be the first to complete the vaccine and save the world! The world is counting on you!

Game Rules:

1. All players must begin by placing their piece on PANDEMIC area. A player must roll a 5 or 6 to successfully sequence a virus DNA (to move to square 1).
2. By default, players must take turns to roll a six-sided dice. They move their pieces forward by the exact number of steps that they rolled. Some events might ask players to roll different dice.
3. Event squares are Blue, Red, Yellow squares with icons. When landing on an event square, the players must reference the manual to take next action.
4. Multiple players can stand on the same square.
5. Player who reaches Vaccine production (square 98) first wins (Rolling the exact number in the last move is not necessary).
